Coatings Color Information

- All colors shown are representation only. Due to screen variations, ink, or other factors, colors shown may be a different than the actual product or sample color sheet.
- All products will be made to the best of our ability to provide uniformity compliant with coating industry standards. For color verification, a color sample is available upon request.
- Standard color options may vary depending on product chemistry. If different product chemistries are required for a project, please request sample for color verification.
- Color may be affected by application technique, surface texture, and lighting conditions when product is applied. Premium/custom color coatings are prone to fade over time.
- White is the only color stocked and ready for shipment upon order being placed. Please allow 7-10 business days for manufacturing of all other color options.
- Premium/custom colors are manufactured with the understanding that the customer agrees to purchase up to an additional 10% of product that may occur during manufacturing process.
