Ure-A-Max

ROOF RESTORATION SYSTEM

THE URE-A-MAX ADVANTAGE

Ure-A-Max is the premier flat roof restoration solution. This hybrid urethane system combines the exceptional durability and adhesion of Aromatic Urethane 520 (base coat) with the superior UV stability, chemical resistance, and weathering performance of Aliphatic Urethane 510 (top coat).

Designed to restore and protect multiple commercial roofing substrates—including spray polyurethane foam, smooth and granulated asphaltic, single-ply (TPO, PVC), EPDM, and structural concrete—Ure-A-Max offers robust defense against wind, rain, and prolonged sun exposure.

Ure-A-Max creates a highly reflective, watertight membrane that's ideal for coating entire roofs, making spot repairs, or adding protection to flashing and other critical areas.

SUITABLE SUBSTRATES

- Spray Polyurethane Foam
- Modified Bitumen
- Built-Up Roofs
- Single-Ply (TPO, PVC)
- EPDM
- Structural Concrete

FEATURES & BENEFITS

- Half the cost of conventional roof replacement
- Stops leaks and improves existing roof performance
- Increases the lifespan of commercial flat roofs
- Improves energy efficiency
- Significantly reduces maintenance costs
- Highly resistant to ponding water
- Industry leading durability, reflectivity, and UV stability
- Cures to form a seamless and watertight membrane
- Excellent adhesion to a variety of flat roof substrates
- Minimal disruption to business
- Long-term NDL (no dollar limit) warranties available

- 1 Existing Roof Substrate
- 2 Urethane Brush-Grade 522
- 3 Aromatic Urethane 520
- 4 Aliphatic Urethane 510

152°F

SURFACE TEMPERATURE

96°F

Minimizing the sun's impact on your roof is key to its longevity. The majority of commercial flat roofing materials are not adequately designed to prevent the flow of heat from constant UV exposure. The Ure-A-Max roof restoration system is proven to mitigate the damaging effects of the sun on flat roof surfaces and effectively reduce interior cooling costs by up to 30%.

APPLICATION PROCESS

SURFACE PREPARATION: To ensure maximum adhesion, the roof is pressure washed to remove all dirt, dust, debris, and any other foreign contaminants.

WATERPROOFING DETAILS: All seams, transitions, penetrations, drains, and other flashing details are waterproofed with Urethane Brush-Grade 522.

BASE COAT: A base coat application of Aromatic Urethane 520 provides the system with a durable, flexible, and fully-adhered foundation membrane.

TOP COAT: A top coat application of Aliphatic Urethane 510 forms a seamless, rubber-like membrane that provides exceptional UV protection, reflectivity, and resistance to ponding water.

THE AMERICAN WEATHERSTAR DIFFERENCE

Founded in 2004, American WeatherStar is an established leader in the commercial roofing industry. We manufacture high-quality, sustainable, and energy-efficient roof restoration solutions for a variety of commercial and industrial applications.

With over 500 million square feet of commercial roofing warrantied throughout the United States, our fluid-applied roof restoration systems are proven to perform under the most extreme conditions and deliver long-lasting waterproofing protection.

The solutions we provide are specially formulated to stop leaks, reduce energy costs, and prolong service life. The quality control measures of our product manufacturing process go above and beyond industry standards to ensure our materials outperform expectations.

We work closely with our Approved Contractors on every project to ensure quality workmanship and customer satisfaction. For added protection and peace of mind, we offer long-term NDL (no dollar limit) labor and material warranty plans for eligible systems.

STARGARD™ WARRANTY PROGRAM

Protect your investment with the StarGard Warranty Program. We offer a variety of long-term NDL (no dollar limit) warranty options for qualified systems when installed by an American WeatherStar Approved Contractor.
