

# American WeatherStar® Coatings Color Chart

## Standard Color Options

- No additional costs for standard colors
- 5 gallon minimum quantity order

## Premium Color Options

- \$8 per gallon additional costs for premium colors
- 200 gallon minimum quantity order

**Custom Colors Available:** Quote required for custom colors with 200 gallon minimum quantity order.

## Coatings Color Information

- All colors shown are representation only. Due to screen variations, ink, or other factors, colors shown may be a different than the actual product or sample color sheet.
- All products will be made to the best of our ability to provide uniformity compliant with coating industry standards. For color verification, a color sample is available upon request.
- Standard color options may vary depending on product chemistry. If different product chemistries are required for a project, please request sample for color verification.
- Color may be affected by application technique, surface texture, and lighting conditions when product is applied. Premium/custom color coatings are prone to fade over time.
- White is the only color stocked and ready for shipment upon order being placed. Please allow 7-10 business days for manufacturing of all other color options.
- Premium/custom colors are manufactured with the understanding that the customer agrees to purchase up to an additional 10% of product that may occur during manufacturing process.

## Product Color Availability

| Product                  | Standard Colors |            |      |     | Premium Colors |           |            |               |             |              |            |           | Custom Colors |
|--------------------------|-----------------|------------|------|-----|----------------|-----------|------------|---------------|-------------|--------------|------------|-----------|---------------|
