

## CLEAR PRIME 9000

**DESCRIPTION:**

Clear Prime 9000 provides an excellent sealer for concrete or masonry surfaces. It will improve adhesion of coating systems and reduce excess usage of top coat materials allowing them to remain on the surface for maximum protection. The product has rapid drying water-based technology and is compatible with most types of top coats. It saves money by reducing absorption of top coats into substrate. Clear Prime 9000 has low VOC technology that meets most VOC regulations and is easy to apply.

**ENVIRONMENTAL CONDITIONS:**

This product cures by water evaporation only. Product must not be applied when the ambient temperature is below 50°F or if there is any possibility it could fall below 32°F within 24 hours of application. Application is not recommended if rain or dew is likely to occur before product dries.

**LIMITATIONS**

Surface must be clean and dry. Do not apply over wet substrates or when inclement weather is imminent. Complete cure of Clear Prime 9000 requires complete evaporation of water. Cool temperatures and high humidity retard cure.

**WARRANTY:**

American WeatherStar warrants that the material supplied will meet or exceed physical properties as published. The contractor guarantees that workmanship will be free of defects in coating application. Since performance of previously installed substrate is beyond the control of American WeatherStar or the contractor, requests for additional warranty coverage shall be subject to prior approval by American WeatherStar.

**TECHNICAL INFORMATION:**

COLOR:	Clear
TOTAL SOLIDS:	25% ± 2%
WEIGHT PER GALLON:	8.6 lbs per gallon ± 0.2
VOC:	100 g/liter
SHELF LIFE:	12 months
PACKAGING:	5 gallon
CLEAN UP:	Water

**SAFETY INFORMATION:**

Read the Safety Data Sheet (SDS) and container labels for detailed health and safety information. This product is intended for industrial use by properly trained professional applicators only.
